Lightweight and corrosion-resistant patented structural alternative to steel that outperforms it and at lower cost

A UK SME has patented a truss structure made of Pultruded Fibre Reinforced Polymer (PFRP) box profiles that are joined without metal or adhesive. It supports the same load as steel but is 60% lighter and does not rust. CO2 emissions are cut by 80% compared to steel. CNC cuts manufacturing cost to compete with steel. PFRP trusses, gantries and frameworks can now be built without metal. Easy shipping, re-use or recycling. Collaboration is sought under licence agreement.

Horizon 2020 Framework Programme (H2020): Green airports and ports as multimodal hubs for sustainable and smart mobility LC-GD-5-1-2020

A clear commitment of the European Green Deal is that "transport should become drastically less polluting", highlighting in particular the urgent need to reduce greenhouse gas emissions (GHG) in aviation and waterborne transport. In aviation, traffic volumes are expected to increase significantly by 2050 and the sector is already generating 14% of the EU GHG emissions from transport. At the same time, waterborne transport accounts for appr. 90% of global trade and 13% of EU transport GHG emissions, while also experiencing continuous growth. In this context, airports, maritime and inland ports play a major role, both as interconnection points in the respective transport networks, but also as multimodal nodes, logistics hubs and commercial sites, linking with other transport modes, hinterland connections and integrated with cities. Deadline date: 26 January 2021 17:00:00 Brussels time

Looking back: Virtual MariMatch

As recently most popular trade fairs of the maritime industry have been postponed or cancelled due to the COVID-19 pandemics the Sector Group maritime industries and services of the Enterprise Europe Network has organised the first Virtual MariMatch a combination of brokerage event, open innovation challenges and a conference programme targeting actual maritime topics. With over 400 contestants from 40 countries the sector groups looks back at a successful Virtual MariMatch 2020. Besides 300 companies participating in the 1 on 1 matchmaking, the interactive content sessions focused on important maritime topics. What's more, leading maritime companies such as DG MARE presented their challenges in the 'Open Innovation Panels'. Every session multiple speakers from all over the world pitched their ideas. In short, many dynamic, varied and inspiring sessions at the Virtual MariMatch. A great opportunity to connect digitally with maritime peers.

Currently the sector group is working on the follow up of the event, the first results are that the event met expectation of nearly 90 % of the participants who have already participated in the follow-up. So far 100 meetings have been rated for relevance by one of the involved parties, nine cooperations are already agreed and 61 additional cooperation are considered as possible according to at least one meeting partner.
